

Ototip-Izoletip TRANSFORMER 1-2000 kVA

They are used for the healthier operation of devices used for industrial purposes. It prevents the reflection of magnetic noises in the network to sensitive industrial devices. In the same way, the reflection of the electrical pollution caused by the devices with non-linear structure to the network is prevented.

In transformers used for voltage reducing purposes 220/12 - 220/24 - 220/48 ; 3x380 / 3x380 - 3x380 / 3x220 It has general usage forms.

FEATURES AND VALUES

Fan Cooling

Optionally
Special production

Energy saving with
High Efficiency

You can access the product page by scanning the QR Code with your phone.

Manufacturing in star, triangle, zigzag and desired phase angle

F or H class insulation

Structure in accordance with TSE and DIN norms

CE Certified

Production in open or enclosed (boxed) type

General Usage Areas

CNC machines

Hospital, operating room isolation system units

All kinds of electronic measuring devices

Power transmission in all kinds of industrial applications

Protection of devices from negative elements of mains electricity

CNC Machines

Insulation Systems

GES/HES

Operating Rooms

Hospitals

Robotic Systems
